1. -----. **All other creatures, except for some domesticated animals which eat food processed by humans, eat their food raw and unprocessed.**
- A) While some creatures eat only meat, some others eat only plants, and some others eat both
- B) Food processing technologies have diversified with advancing technologies
- C) Cooking can be said to be the earliest form of processing food
- D) Humans are the only creatures that eat cooked food
2. **It can be a rewarding and fulfilling experience to become a parent by blending families or marrying someone with kids. In some cases, your new family members may get along without a hitch. -----.** **It is important to approach this new situation with patience and understanding for the feelings of those involved. You need to let things develop naturally.**
- A) Kids enjoy being around someone who is always fun or agreeable
- B) Obviously, it makes life easier
- C) But other times you can expect difficulties along the way
- D) Unfortunately, you have to accept that challenging situation
3. **Tropical forests probably harbour about half of all species on Earth although they cover only about 7 percent of the Earth's dry land. Many species are so confined to microhabitats within the forest that they can only be found in small areas. -----.** **In addition to the species lost when an area is totally deforested, the plants and animals in the fragments of forest that remain also become increasingly vulnerable, sometimes even committed to extinction.**
- A) As a result, all the animals in deforested areas die
- B) The other half of the species settle in wetter regions
- C) This makes them easily subjected to extinction
- D) In these areas, little microorganisms can survive
4. -----. **Some fear we may have already peaked in the use of fossil fuel. So much of the world relies on oil that if there has been a peak or if a peak is about to happen, it is surely an environmentally, geopolitically, and economically important problem that we should be sensitive to.**
- A) Many fear that the world is quickly using up the vast but finite amount of fossil fuels
- B) It has not been recognized that energy security is a concern
- C) Markets are good for making profit and allocating resources efficiently
- D) Reality sees a mixture of politics, power play and corruption

5. **Despite the existence of many other prizes offering large sums of money, why has the Nobel Peace Prize acquired such enormous prestige? -----.**
This is partly accidental, but also a question of the age of the Prize. However, it must also be attributed to the assumption underlying the broad range of criteria of strong moral element. It appears to be precisely this type of prize which has the potential to attract people's attention.
- A) The spiritual value of it is more important than money
B) One of them can be attributed to the scientists' contribution to science
C) It depends on how many years they have failed to deserve the prize
D) Because none of them have so far matched the Nobel Prize in prestige
6. **All people should combat global warming in order to protect the world, and one of the best ways to do this is to utilize renewable energy sources. Since the early years of the 18th century, alternative energy sources were put into limelight. -----.** **However, up to now, only a few countries have developed these as their energy sources.**
- A) Tidal power is cost-effective compared to the other energy sources
B) A lot of research was carried out about them, and many countries passed laws regarding their implementation
C) The most important renewable energy source is solar energy
D) Wind power is considered cheaper than solar power
