TEST 2**SOLAR GLASS**

A solar power company announced that they developed a new (1) of cheap colorful solar glass. "From now on, we (2) put solar panels on top of buildings because we can use solar glass in the windows of buildings," said Kevin Arthur, (3) the company's founder and CEO. "Almost all of the buildings have windows, so you are not adding any extra cost because solar glass will be (4) normal glass. They have (5) same cost."

When they first (6) the new solar glass, it did not work very well. While they (7) at it after the test, they thought that it could be because of the color of the glass. The problem disappeared when they (8) the color. "We (9) print different colors on the glass; but each color has a different efficiency: for example, black works more actively than green," said Arthur. The group worked very hard (10) the most effective product.

Next month, the company (11) producing the new solar glass in large amounts. Arthur thinks the product (12) very successful in the market. The company (13) any solar systems before, so this will be very new for them. We will see the new system in buildings (14) two years. Solar power worldwide reached 100GW capacity last year for the first time. People are paying more attention to the environment day by day. We (15) waste energy if we want to have a future for our planet.
